

Heating On Prescription Service (HOP)

Heating on Prescription is for patients struggling to keep themselves warm at home and who are eligible for the free NHS flu vaccine due to a health condition, age, or medical treatment.

Eligible patients will be offered help with practical solutions to reduce energy costs and tackle the causes of heat loss, damp and mould in their homes.

HOP will provide support for people with a health condition made worse by the cold in the form of personal warmth items and financial support with energy bills to help them to heat their homes to a healthy temperature over the winter months.

You can refer patients who:

Have a household income of less than £30,000, and savings of less than £16,000, and who pay council tax to Leeds City Council.

If you work in Primary Care, you can access the HOP referral form via the Fuel Poverty tab in SystmOne or EMIS.

If you work in another healthcare setting such as LCH, LTHT or LYPFT please email Green Doctors on: greendoctoryorkshire@groundwork.org.uk to receive a copy of the referral form.

Care and Repair and Green Doctor working in partnership to deliver Heating on Prescription.

GREEN
DOCTOR
