HOME ENERGY HELP

YOUR HOME BUT BETTER

Tackling heat loss by installing energy-saving measures and low carbon heating can take your home to the next level; making it easier to keep your place at a comfortable temperature, while also cutting your bills.

Leeds City Council is giving away green upgrades to eligible homeowners, renters, and landlords in Leeds that **don't use gas central heating**.

If you qualify, you could receive government-backed financial support to improve your home with measures such as solar panels, insulation, or an electric heat pump system.

Trusted contractors will recommend the most suitable upgrades for your property and make everything easy along the way.

Eligible homeowners will receive upgrades completely free of charge. Eligible landlords will receive a two-thirds discount on upgrades.

Find out if you qualify for funded energy upgrades online or by phone
